

## Bachelor of Science in Biomedical Sciences

### Mission and Statement:

#### Why is our program Special?

We are a special program because of the innovative curriculum that focuses on preparing students to be successful in health and biomedical professions, in a flipped classroom format with small classroom sizes and active learning.

### Research Opportunities:

We offer research experience opportunities and mentorship. See link for undergraduate research successes: <https://www.utrgv.edu/hbs/student-achievements/bs-biomedical-sciences/conference-achievements/index.htm>

### Interprofessional Education (IPE) Opportunities:

BMED students who would like to participate in clinical experiences with healthcare professionals have the opportunity to apply to the BMED Scholars. If not selected, as a BMED Scholar, students can still contact the Director for opportunities in interprofessional activities. See link, for more details: <https://www.utrgv.edu/hbs/student-engagement/bs-biomedical-sciences/bmed-scholars/index.htm>

### Study Tips to help you succeed

- Plan ahead the steps needed to pursue career of choice ( Understanding why you are doing what you are doing, provides motivation to study)
- Organize and manage time; be proactive, and don't procrastinate
- Test yourself with quizzes, end of chapter problems and with peer and team study, to check for understanding and ability to explain material

### Scholarship Opportunities

- BMED Honors students are offered scholarships by Honors college. UTRGV offers scholarships to outstanding students (<https://www.utrgv.edu/scholarships/>).
- BMED faculty offer undergraduate research assistantships to students in their labs, if funds are available.

### Employment Opportunities

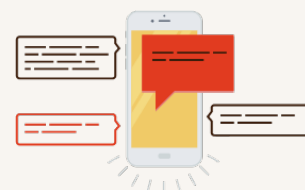

Salaries vary depending on profession and educational level (Generally 25,000-45,000, if a school teacher or lab technician with a BS degree). Here's a link of some BMED alumni, who pursued higher education. <https://www.utrgv.edu/hbs/student-testimonials/bmed-testimonials/index.htm>
