Professional Summary

To continue to advance and grow in the field of Graphic Design and Art. I have eight years of experience working in a medical facility which emphasized the importance of teamwork and often required creative solutions and brainstorming to solve problems related to the task at hand. Due to this, I work well in a group as well as in a solo environment. I held a leadership position for 2 years before stepping down, so I am capable of a leadership position though I prefer to work as part of the team rather than above it. I can work in a fast-paced high stress environment as well as multitasking. I am proficient in Photoshop, Illustrator, Procreate, and Adobe InDesign. I am also well-versed in traditional medias such as painting, drawing, and various methods of printmaking.
