## Objective

As a graphic designer, I am creative, multitalented, and versatile. I am working toward becoming a skilled art teacher. I will be graduating in Spring 2022 with a major in Graphic Design. I am currently enrolled at University of Rio Grande Valley with four years' experience working in the medical field as nurse assistant. The Edinburg Regional Hospital has recognized me for my hard work and achievement by rewarding me an Ace-It Award. With past work experiences it helps me experience what it is like working in fast pace. Working in fast-paced working environment in the past gives me insight into how it feels to work in setting. It is my passion to gain experience in the art of education, and I believe it will be beneficial to me. I look forward to working with your company.
