

STEM Summer camps

MATH + ART SUMMER CAMP High School Students

To solve real-world problems, numerical methods are developed and coded.

In this camp, students will be exposed to Matlab, a software used much in industry and in university applied mathematics and engineering programs.

Participants will:

- ★ Learn to code in Matlab
- ★ Create art through coding while solving math problems
- ★ Implement numerical methods to solve real-world problems

JUNE 10TH - 14TH
MONDAY - FRIDAY
9:00AM - 12:00PM
