

Energy Assessment

Course description: The training combines classroom training with implementation of concepts. Participants along with instructors walk the floor looking for air leaks, inspecting trash cans, and watching specific processes closely.

This course focuses on learning how to measure the right parameters and find opportunities in order to make the appropriate changes and improve.

Topics Include:

- Lighting
- Compressed Air Systems
- Motors
- HVAC Systems
- Money Saving Opportunities

Objectives:

- Determine energy usage, demand, and costs
- Identify trends and anomalies
- Examine for correct billing, fees, penalties
- Calculate avoided costs
